

## Sprintable Stories

### ID Story

- S1 As a user I want to be able to put information about a particular student in a file so that I can have a permanent records.
- S2 As a user I want to be able to enter the file names to use at the command line so that the system can be used with more than one student.
- S3 As a user I want the system to calculate the average GPA for a group of students (each of who's information is contained in a file).

### Acceptance Criteria

- The company has a document describing the file format
- The company has an example file
- The system displays the correct output for a system test that uses the example file
- The system displays the correct output for each of the system tests created for the previous increment
- The system displays the correct output for the cohort consisting of all of the students in the system tests created for the previous increment
