

bookz Files (v1)

Overview

bookz files contain text (e.g., the words in a book)

Format

bookz files contain a continuous stream of ASCII characters.

They do not contain carriage-return (ASCII 13) or line-feed (ASCII 10) characters. However, they are formatted in some sense. Specifically, bookz files consist of a sequence of “lines”, each of which is exactly 80 characters long (padded on the right with spaces).
