

Participate in a Research Study! (*IRB-FY25-248*)

- **Goal:** We are investigating the use of "think-aloud" techniques for improving student code tracing.
- **Task:** The study will involve solving code tracing problems in Python and rating the difficulty of each problem and your confidence with your answer.
- **Estimated time:** ~30 min
- **Compensation:** You will receive a candy bar for participating.
- If interested in signing up, or you have more questions, email Dr. Isaac Wang: wangid@jmu.edu
