"container has width of 992px when viewport is "lg"..."
https://getbootstrap.com/docs/5.3/utilities/sizing/

Congratulations
Early Admits!
Here are 4 ways to get to
know our CS Department!

KING HALL

Ask me a question!

What's the most common programming language at JMU?

What's next?
The One Book,
Orientation, FROG 🐸

Whoa!
Can't believe he's
missing this!

What's it like?
Typo. It's typo.

10.33" looks like appx 992px to me, and that's bootstrap's "lg" breakpoint, so since google slides doesn't seem to have px units for width and height, i adopt the function of desired px *10.33/992 = inchesInGoogleSlides
