

Peer Review of Project Proposals

You have been hired as consultants!

Dr. Chris Mayfield

Department of Computer Science
James Madison University

Feb 10, 2022

Review process: Phase 1

Trade proposals with two other groups

- ▶ Ideally your “left and right” neighbors
 - ▶ Give your third copy to the instructor
-

Read the proposal [5 min]

Discuss the content [5 min]

- ▶ Make edits, write comments, mark things up!

Apply the rubric [5 min]

- ▶ In each row, circle and/or underline *specific words*

Review process: Phase 2

On the top of each rubric, write an *overall grade*

- ▶ **A** = excellent, definitely “fund” this project
 - ▶ **B** = good, just need to improve minor issues
 - ▶ **C** = acceptable, but need to fix major flaws
 - ▶ **D** = inadequate, or did not take it seriously
-

Explain feedback [5 min]

- ▶ What are the proposal's strengths?
- ▶ How can the proposal be improved?
