

Apps4VA

Using student data to improve education

Effecting Change Through Creative Data Use

PRESENTATION OBJECTIVES...

- Overview of Apps4VA
- Overview of VLDS
- Introduction to Apps4VA JMU
- Demo of Cool School App
- Overview of Apps4VA HS Competition I
- Feedback on Apps4VA HS Competition II

ENTER ARRA AND THE VLDS

2009

Federal funding to build a longitudinal data system

2009–2013

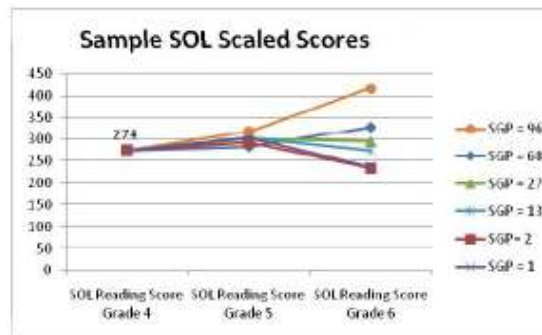

Four founding agencies collaborated on a pioneering effort to launch a system that can be expanded to include other agencies

WHAT GOOD IS THE DATA IF NOBODY USES IT?

- How can we reach beyond accountability requirements?
- What types of applications would users want and need?
- How can we spread the word?

- How can we improve student outcomes?
- What if we could track students not only during K-12, but beyond – even into the workplace?

The possibilities are endless!

ENTER APPS4VA: LET'S UNLEASH THE POWER OF DATA!

- Launch a software application (apps) development program
- Challenge the public to
 - review the data and design new and different ways to interpret it
 - create new tools to achieve the goal of better data-driven decisions

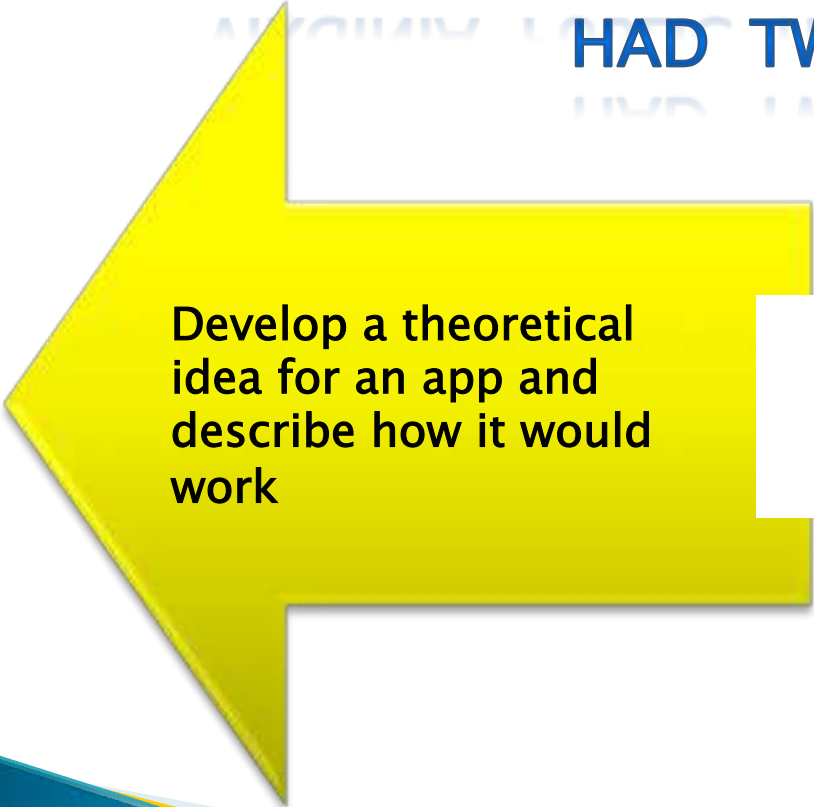

COMPETITIONS

VIRGINIA PUBLIC HIGH SCHOOL STUDENTS HAD TWO OPTIONS:

**Develop a theoretical
idea for an app and
describe how it would
work**

**Create an actual
working prototype**

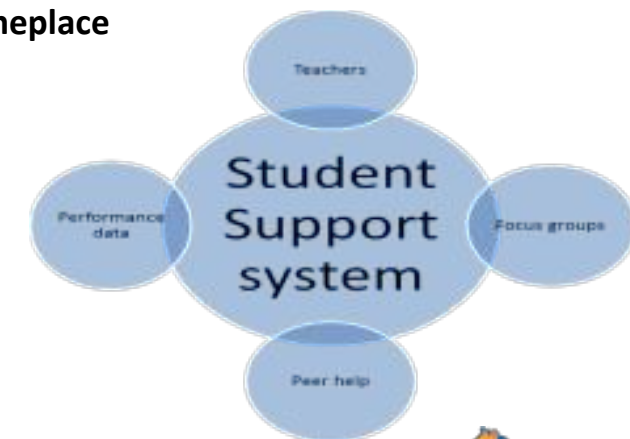

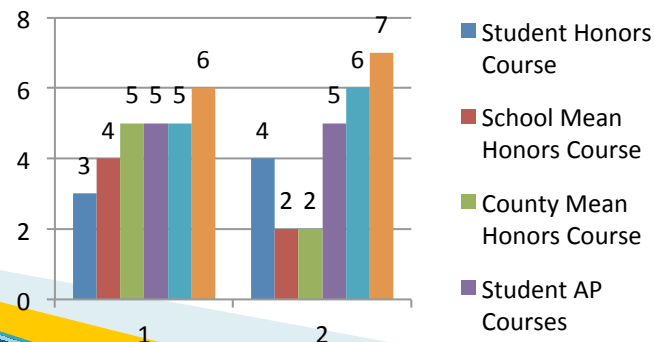

FIRST PRIZE WINNER: CONCEPT APP

Student Dashboard

Real-time info on a dashboard allows students to monitor performance and compare it to peers. Includes a peer support system and guidelines for data interpretation.

“...it may be possible to understand trends in study habits and better them by providing timely help to students who are most in need. The idea is to create a student dashboard on blackboard or someplace where the student constantly gets information

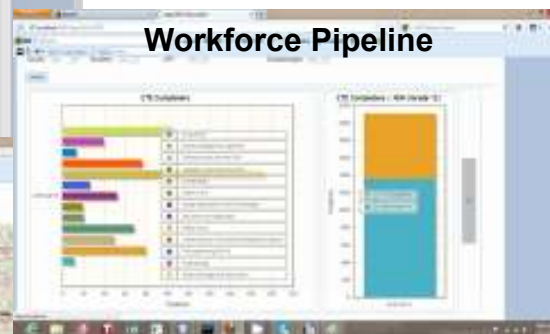

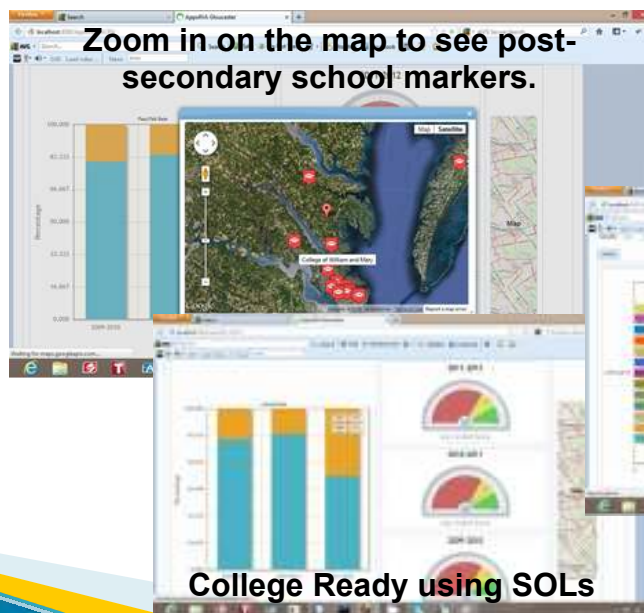

Dynamic Dashboard that keeps getting populated every time a grade is posted

FIRST PRIZE WINNER: PROTOTYPE

https://dps.gc.k12.va.us:8443/Apps4VA_GCPS/

P2S
Path to Success

Spring 2013 and 2014 Semesters

“Start with an education question you think is important. Then pick at least one dataset from VLDS and create a new way to use the data. Mashups are encouraged”

WHAT TYPES OF APPS DID THE STUDENTS CREATE?

2014 Winners – 1st Place

Cool School: Enables families to compare nearby schools and divisions which are ranked based on test scores, enrollment rates, and graduation rates. Useful for considering home purchases/moves.

Digiapps: Allows parents and educators of special needs students to identify and rank schools that match students' needs using t-tests.

NULL: Reveals how school schedules impact student learning capabilities by comparing school schedules and student performance across the state.

"It was [a] challenging and intriguing mission that prepared us to work with real data for the real web application."

–2014 CS474 Student

"I had a lot of fun working on the Apps4VA project!"

– 2014 CS474 Student

WHAT TYPES OF APPS DID THE STUDENTS CREATE?

2014 Winners – 2nd Place

**Database 2:
The SQL** Helps parents, teachers, administrators, and policy makers to help identify students who are most at risk of dropping out of high school.

**Victorious
Secret:** Allows users to compare SOL scores and Career and Technical Education (CTE) completers by region or school to labor market projections in the area.

SOL-ution: Provides teachers with easy access to their students' SOL test scores and tools to compare current classrooms with previous cohorts.

“...it transformed a mere school project into an exciting opportunity.”

- 2014 CS474 Student

“I’m excited to continue working on the project.”

- 2014 CS474 Student

“The apps4va was an incredible and rewarding learning experience that I will never forget.”

- 2014 CS474 Student

WHAT TYPES OF APPS DID THE STUDENTS CREATE?

2014 Apps4VA JMU Winner

U.S.S. Pintos Home About Apps4VA VLDS

Cool School: Find your perfect school system.

Select a Division ▼

Search

Select a school division and get a list of the five best school systems from the surrounding area.

Our VLDS powered rating algorithm takes into account various factors including **test scores**, **graduation rates**, and **college enrollment rates**.

WHAT TYPES OF DATA ARE AVAILABLE?

 Click on a Data Set below, for details

🕒 Fall Membership
🕒 December 1 Special Education Child Count
🕒 Test Data
🕒 Career & Technical Education (CTE) Program Graduates and Completers
🕒 Annual High School Graduates and Completers
🕒 Annual Dropouts
🕒 On-Time Graduation Rate and Cohort Dropout Rate
🕒 Postsecondary Enrollment
🕒 Postsecondary Achievement

WHY IS THIS IMPORTANT TO STUDENTS?

- Real data on real students, not “dummy data”
- Data is about them – Virginia Students
- Apps could benefit Virginia Students
- Experience in helping to solve real world problems

Scaling Apps4VA JMU (CS474) to a high school program

- What are reasonable expectations of high school students?
- How would the program look?
- Requirements
- Incentives:
 - Option to fulfill the “Performance Task” requirement for the new AP curriculum
 - Guidance,
 - Opportunity,
 - Prizes,
 - Recognition
 - Others?
- Recruitment
